Before AutoCAD, most commercial CAD programs were aimed at mechanical design, but were often very expensive and not user-friendly. By contrast, AutoCAD was designed to be a user-friendly, inexpensive design application. Although inexpensive compared to other commercial CAD programs, AutoCAD was the first CAD software to cost more than \$100 USD. Since its inception, AutoCAD has remained fairly stable and hasn't changed much aside from minor updates. For example, AutoCAD 2000 was released in January 2000, AutoCAD 2008 was released in December 2008, and AutoCAD 2010 was released in November 2010. In addition to minor upgrades, AutoCAD 2011 introduced dynamic block editing, improved measuring tools, improved graph tools, and improved 3D modeling features. AutoCAD 2012 introduced a new 2D drawing view (Partner View), and AutoCAD 2013 introduced a new 3D drawing view, AutoCAD Online, and the ability to integrate AutoCAD with Autodesk's other software. These include Home, Drawing, Modeling, and Edit tabs, as well as an Options tab and a Help tab. You can also access AutoCAD's features through drop-down menus, toolbars, and shortcut keys. AutoCAD 2014 has a new ribbon that is split in two. One half, known as the Standard View, is the default ribbon that provides the Home, Drawing, Modeling, Edit, and Options tabs, with a few minor changes. The other half, known as the Advanced View, is a more customizable ribbon that provides an additional three tabs (2D Drafting, Properties, and Web) with a few new features. Autodesk's web services are a form of web service framework that is designed to make it easy for third parties to build add-on applications that work with the Autodesk applications. The Framework allows developers to build AutoCAD extensions and add-on applications that help to automate the process of building design workflows. For example, some of the extensions are used by field engineers to perform tasks such as 3D model check, land titles, or satellite imagery capture in the field. Indications for spine fusion include congenital deformity, trauma, degenerative diseases, neoplasm, infection, and scoliosis. Indications are evolving, and now include growing pains and low back pain. Patients with scoliosis should be treated by nonfusion techniques until clinical and radiographic evidence indicates that fusion is appropriate. Fusion is a demanding procedure requiring a certain degree of technical skill. This article reviews the approach to pedicle screw instrumentation for thoracolumbar fusion.A new petition has been launched to have Tamam Shud's shebeen shut down by the Liquor Authority. The shebeen is located at No. 49 Hayshore Road, a two-minute walk from the proposed site of O'Connell's pub, which is also located on the same road. The Penguins were at a bit of a disadvantage and the Panthers had the advantage on the scoreboard at the half, but this isn't a perfect marriage of a new formation for the Penguins. Instead, it's more of a stylistic change that has only been in the Penguins' system for a year. It's a system that has the Penguins at their best. At the half, the Penguins trailed the Panthers, 2-1, on two goals by Brad Boyes and one goal by Derek MacKenzie. They had a perfect scoring chance by Sidney Crosby to break the tie, but he couldn't find the back of the net. He may or may not find the back of the net early in the second half. Sidney Crosby had an assist on Patrik Hornqvist's goal at 12:37 of the second period. That was the only other goal allowed by the Penguins in the first half, when they allowed five goals. They allowed four goals in the first period. Three of the four goals came in the first period. There was more of a line-matching issue in the second half. Both Derick Brassard and James Neal were healthy scratches. Brassard, who has five goals, was a healthy scratch for the first time this season. Neal, who has seven goals, was healthy scratched for the first time. Neal has been an offensive catalyst since returning to the lineup at 5 on Dec. 9. He was a minus-4 in the first eight games of the season and has been a plus-10 in the last 10 games. Brassard has been very good with the puck. He has two goals and one assist in the last 10 games. Brassard, however, has a minus-4 rating in the last 10 games. He has a plus-2 rating overall and a plus-3 rating in the last 10 games. Neal had an assist on Brassard's goal, Hornqvist's goal and Crosby's goal
