Windows 10 is now one of the most popular operating systems in the world. It has come a long way since its humble beginnings and now the new Windows 10 is about to hit its first birthday. Just a few years ago it came out of its experimental phase and it is now the leading OS of the world. Well, you might have some questions about it. For example: how to upgrade to Windows 10? Well, here you can find a couple of tips and tricks to achieve this. Now, you might ask yourself why you need to upgrade your computer. For instance, Windows 7 is an operating system which is more than suitable for the average user and still provides all the performance which you are used to. But, of course, you might want to make a switch and Microsoft has many advantages for you. First, you might need to switch to Windows 10. There are many reasons for that. You might want to use the new features, such as Windows Defender, Battery Saver, and the new Windows Ink. There are also many security enhancements and updates. And last but not least, you might need to upgrade just to get the latest version. For that, you will need to wait a couple of weeks. In that time, the Windows 10 Fall Creators Update will become available. And, when that happens, you will be able to upgrade to the new operating system. If you want to do that, you will need to update your computer to Windows 10. Fortunately
