DESCRIPTION SCRUB is a small command line tool that can be used to clean floppy diskette drive heads. Used in conjunction with any liquid floppy cleaning kit. Waves the disk heads over the entire diskette cleaning surface for 40 seconds. SCRUB Description: DESCRIPTION SCRUB is a small command line tool that can be used to clean floppy diskette drive heads. Used in conjunction with any liquid floppy cleaning kit. Waves the disk heads over the entire diskette cleaning surface for 40 seconds. SCRUB Description: DESCRIPTION -- -- -- -- A: The solution is simple: you need to remove the disk from drive, and clean it manually. The reason why you are not able to clean the disk when it is inserted into the disk drive, is because there is a head that can lift the disk from the drive, when necessary. After that, you need to lower the head in order to clean the disk. When the head is raised, there is also an arm which is

---

used to align the head with the disk, in order to read and write. This arm is also used to rotate the disk. After cleaning the head and the arm, you need to lower the head and use the arm to rotate the disk. This is called head lifting. ////////////////////////////////////// //

[verb] [disk] [timeout=...][tgt] [delay] [time] scrub [verb] [disk]  
[timeout=...][tgt] [delay] [time] [freq] scrub [verb] [disk]  
[timeout=...][tgt] [delay] [time] [freq] [head] scrub [verb] [disk]  
[timeout=...][tgt] [delay] [time] [freq] [head] [FREQ] Specify the  
number of times (times in milliseconds) the disk is scrubbed. The  
number of rotations is determined by the number of times the disk is  
scrubbed. [HEAD] Which head(s) should be scrubbed. Valid options are:  
\* Scrub all drives. \* Scrub only the active head. \* Scrub only the active

---

and backup heads. \* Scrub all heads except the backup head. [TGT] Target drive. If no target drive is specified, scrub will target all the drives. [DELAY] Time to wait before scrubbing the drive(s). If no delay is specified, scrub will run as quickly as possible. If a delay is specified, scrub will pause and wait for the specified amount of time before running. [TIME] Time to wait before scrubbing the drive(s). If no time is specified, scrub will run as quickly as possible. If a time is specified, scrub will pause and wait for the specified amount of time before running. [TIME] The number of rotations of the disk. [TIME] The number of seconds to wait before scrubbing the drive(s). If no time is specified, scrub will run as quickly as possible. If a time is specified, scrub will pause and wait for the specified amount of time before running. [FREQ] The number of times to scrub the drive(s) before scrubbing a second drive(s). If no FREQ is specified, scrub will run as quickly as possible. If a 1d6a3396d6

SCRUB is a small command line tool that can be used to clean floppy diskette drive heads. Used in conjunction with any liquid floppy cleaning kit. Waves the disk heads over the entire diskette cleaning surface for 40 seconds. Dependencies: None SCRUB Usage # Make sure that the bath is FULL! \$ scrub -D floppies # If there is no floppies in the drive, you get no output \$ scrub -s # If you do not supply any arguments, scrub cleans all floppy heads \$ scrub Description: SCRUB is a small command line tool that can be used to clean floppy diskette drive heads.
