Model: E5330Bs-2 App Port: COM34 Diagnostic Port: -- IMEI: 868988027***** Firmware Version: 21.210.21.00 .1065 Build date: September 29 ...# ## Let's say you have a Huawei E5330Bs-2 modem with firmware version 21.210.19.00.274 configured, and the modem shows 0 of 10 remaining unlock attempts. And you want to unlock it (for example , for use on other networks). How can this be done? If you use a tool to read the contents of the modem's flash (i.e. using the FLASH E2B command, etc.), then you can access that flash and save/restore the data. If you are using a modem unlock software such as Unlocker, then you may see that there is no IMEI in the modem traffic because it is not shown during the unlock process.
