AutoLISP is an extension language for the AutoCAD editor used for customization or scripting of the functionality of AutoCAD or AutoCAD LT. AutoCAD LT AutoCAD LT is a drawing program from Autodesk for use in offices with an IT infrastructure. It is designed to run on Windows, macOS, and Linux. It has a graphical user interface and is a word processor, but it is not an integrated office suite as it lacks the capability to run third party programs, such as the ability to integrate with email, create appointments or maintain calendar events, and contains no integrated office suite. It is compatible with Windows XP, Vista, 7, 8, 8.1, 10 and the three macOS versions: 10.7, 10.8, and 10.9. AutoCAD LT comes in two versions: the Professional Edition which includes 3D modeling, DWG and DGN (drawing) files, drafting, drawing, and annotation tools, with basic 3D plotting and topology functionality; and the LT, which is also a fully functional version of the software without 3D functionality. AutoCAD LT for Windows is based on the underlying Microsoft Windows XP operating system and will run only on Windows XP, Vista, 7, 8, 8.1, 10, and the three macOS versions. As of Autodesk 2017, the only current alternative to AutoCAD LT is the free Autodesk Fusion 360. Mac The first version of AutoCAD for macOS was AutoCAD LT, a Macintosh version of the AutoCAD for Windows series of programs. AutoCAD LT is capable of being used on PowerPC-based Macintosh computers with OS versions up to 10.3.5 and on Intel-based Macintosh computers with OS versions up to 10.4.4. It was discontinued with version 14 of AutoCAD LT, when it was replaced with the completely new AutoCAD for Mac 2015 product. This new version for macOS included a new version numbering scheme (version numbers for AutoCAD for Mac are always eight digits instead of seven in AutoCAD for Windows). The first AutoCAD for Mac version, AutoCAD LT for Mac, was released in September 1993. As with other Autodesk applications, AutoCAD LT for Mac also allows the user to install third-party plugins or add-ons called "AutoCAD Extensions" that extend the basic functionality of the software. Nelson Miramax to Open Office in Toronto Miramax Films is moving its studio operations from Santa Monica to Toronto, Canada, says a report in the Toronto Star. The studio, which is best known for The English Patient and Pulp Fiction, currently has two Toronto-based offices, one in the city's financial district and one in the Avenue of the Americas district. The Avenue of the Americas location is being closed, according to the paper, and Miramax will be keeping its finances and mail there. "We'll still be doing business from the Avenue, but we will relocate our studio operations here," Miramax co-chairman and founder Harvey Weinstein told the Toronto Star. "The transition will take a couple of months to complete." The Miramax office in Avenue of the Americas on King Street West will close during that time. "The staff there will stay on as our employees, but we will be doing all of our business from this location. Everything else is going to be in Toronto," Weinstein told the paper. "We hope the entire transition takes about two years, but that depends on how long it takes to open and get going," he added. "We'll have our [Studio] Logo at the Avenue of the Americas and also our businesses at the Avenue of the Americas."
