What's New in the Xmas Tree Constructor?

Xmas Tree Constructor is a small, yet functional, app that can create beautiful Christmas trees that you can place on your desktop. It is built using the open-source GTK+ widget toolkit and can help you decorate your desktop in a way that will put a smile on your face. ===== Bolt If I would write an article like this I would just: A quick browse through the settings window reveals dozens of styles, colors and models of all sizes to choose from. You can also load your own tree styles in case you have them saved in a PNG, BMP or JPEG file format. In addition, the application enables you to alter the hue, contrast, size, brightness and opacity for each type of decoration you want to add to your tree. This is what most of the article is about (and what it is complaining about :-)) ===== d33 I like it. It's simple, looks great, and does what it says. That being said, I would love to see a "File->Make new tree" option. This apparently has a tree generator that gives you some nice options, but it would be nice to have a manual generator that does the same thing. ~~~ d33 Ah, forgot that most of these comments are not addressed to me. ----- XmasTreeConstructor Description: Xmas Tree Constructor is a small, yet functional, app that can create beautiful Christmas trees that you can place on your desktop. It is built using the open-source GTK+ widget toolkit and can help you decorate your desktop in a way that will put a smile on your face. ~~~ Bolt If I would write an article like this I would just: A quick browse through the settings window reveals dozens of styles, colors and models of all sizes to choose from. You can also load your own tree styles in case you have them saved in a PNG, BMP or JPEG file format. In addition, the application enables you to alter the hue, contrast, size, brightness and opacity for each type of decoration you want to add to your tree. This is what most of the article is about (and what it is complaining about :-)) ----- Bolt This is great. Simple, clean, fast, beautiful. ~~~ spencertunnel I agree. /* *- Mode:C++; c-file-style:"gnu"; indent-tabs-mode:nil; -*- */ /* * Copyright (c) 2006,2007 INRIA * * This program is free software; you can redistribute it and/or modify * it under the terms of the GNU
