MAXA Crypt Portable is a free program for portable Windows-Computers that can encrypt your files and folders and create compressed files on a selected folder. Files and folders that are encrypted by this software will be password protected. It is possible to use several file naming conventions and it is also possible to compress the encrypted files. The program is designed for those that do not want to store the encryption key on the computer as the programmer is storing the key in the MSN profile. Since the password are created by the user you have full control over them. MAXA Crypt Portable has been designed to create a security-funnel that hides data as it goes through the Internet towards your storage medium. Features:

- Encrypt files, folders and your text messages.
- Ability to change the default file naming convention and to compress.
- Ability to hide a group of files.
- Ability to make different keywords.
- Ability to change the encryption key size.
- Can't remember the encryption key? Never

worry about it again! • Use your TOTP app as the encryption key.

- Can encrypt/decrypt to/from hundreds of file formats (reimplement if you like)
- Note : this program includes all the compression features that can be done with MAXA Crypt.
- NOTE : this app will only work if the user is signed into MSN on his computer

MAXA Crypt Mobile (Former MAXA Crypt Portable)
Description: MAXA Crypt Mobile is a free program for Windows-Mobile-Phones that can encrypt your files, folders and texts using the 256-bit Rijndael algorithm, winner of the Advanced Encryption Standard contest. Multiple files can be encrypted into one file and are even compressed in their size. The program is smaller than 500kb and can be run on every Windows-Computer (on Linux as well using Wine) without need of installation and therefore is ideal for use on mobile storage media (like USB-Sticks).
