method for the production of porous fibrous scaffolds from bovine tendon by electrospinning. An ultrasound assisted electrospinning method was used to produce porous fibrous scaffolds from bovine tendon. A range of electrospinning parameters were investigated and the structure and mechanical properties of electrospun scaffolds were analyzed. The scaffolds were characterized using the porosity, water absorption, mechanical strength, and the effects of surface morphology. The best average porosity, mechanical properties, and pore size distribution were obtained for the scaffolds prepared with a 5% weight ratio of hydrophobic glycolide and 85% weight ratio of hydrophilic poly-ethylene glycol. Moreover, the deformation of the scaffolds after the compression test was higher than that of the control scaffold. These

---

scaffolds had a good structural integrity. The ultrasound time and needle diameter did not have any significant effects on the scaffold structure, except for the the pore size.[Chemotherapy for advanced lung cancer: a 2-year evaluation]. Fourteen patients with inoperable or recurrent lung cancer were treated with a combination of cyclophosphamide and adriamycin. The dose of cyclophosphamide was 500 mg/m<sup>2</sup> and that of adriamycin was 50 mg/m<sup>2</sup>. All patients were assessed at the end of 2 years from the beginning of the treatment. The response rate was 57.1% and the median survival time was 48.5 weeks. The best results were noted in patients with bulky tumor and good performance status. Our results suggest that a combination of cyclophosphamide and adriamycin could be a useful regimen for

---

patients with advanced lung cancer. Upsides and Downgrades UBS downgraded its rating on Transocean (NYSE:RIG) to Underweight from Equal Weight with a price target of \$24.00, which implies a projected compound annual growth rate (CAGR) of -0.9%. UBS also sees the stock trading below its intrinsic value of \$20.00 based on the company's market capitalization and marginal profit growth. Transocean currently has an average rating of Hold and an average target price of \$25.91,

Download.Q: Does  $2^{1024}$  equal 1 GB?  
According to wikipedia  $2^{(1024)}$  is 1 GB. I have many text files of size greater than 2 GB and I wonder if they can be considered as 1 GB. I will be moving them to a NAS drive and eventually to a external hard drive. I'm also worried about space-competition on the NAS drive. So this is my question: If the space-competition is a concern, and I'm pretty sure it is, does it make more sense to take the file and compress it to even 1 GB rather than ending up with 2 GB worth of text files? A:  $2^{1024}$  of anything is  $1.1 \times 10^9$ , which is  $2^{(1024*9)}$ . But  $2^{(1024*9)}$  is only  $1.1 \times 10^{18}$ , which is a bit more than 1 GB.

---

In fact, your files have to be at least  $1.1 \times 10^{18}$  in order for them to fit in 1 GB. Brom's Auto Repair & Mechanical Services in Ft. Worth, TX I would highly recommend BoBrom to anyone looking for great automotive services and friendship. He is also very punctual, courteous and professional. BoBrom has been absolutely fantastic to us. The guy has been patient with my father, who had a problem with his car, and checked it thoroughly. It was great to have him explain everything to my dad, and tell him what exactly was the problem. The cost was very reasonable, and BoBrom found everything with ease (car-related or not). He got us a estimate and price for the service, and he was right on. He got the job done professionally, and did it within the same day, after-hours.ase 2 (p53); cleaved-Caspase 3 (CASP3), and cleaved-

There's an official trailer for the upcoming Anne of Green Gables TV movie! I like it. (I also like Anne.) And this: Sure, it's a dumb trailer, but even so -- well, it's just nice to see Anne kicking butt. This is great. Will Pacey--the real Pacey Witter,
