If the software is installed from the CD, then go to "Internet Options" and check that "Active X Controls" is checked under "Active Scripting". Open "cadlink" by double clicking. Press Enter. Autocad does not have a keygen so there is no way to make the keys. You can however unlock the product if you purchase it (and it is worth every cent of it). I suggest you to keep the key free and use it only for autocad 2010 where it can be activated. But if you really want to use the activator for autocad 2002 or 2003 you can download this and make it work. Q: Why does xtable() ignore some columns?
