Lost Ruins is a deep RPG and action role-playing game based on the latest hit anime, One-Punch Man. The story takes place in a mysterious underground maze called Lost Ruins, where a young girl named Lucia wakes up one day to the memories of a legendary hero called "Beatrice." Joined by a female companion named Sora, she sets out on a perilous journey to learn about her past. You can talk to Beatrice and Sora whenever you want throughout your adventure, and they will give you important tips and information for completing the main story. In a world ravaged by Dragons, Elves and Demons, Humanity is ruled by a group of elite Dragonborn. They seek to bring Dragons back into a world of sanity. Driven by threats that will soon be unleashed on the world, the Dragonborn and their allies must work together in order to stop the destruction of the Human race. The fate of the entire world lies in their hands. Features Diversity: Fantasy Grounds has a fantastic array of creatures to choose from when creating your Dragonborn army. From the original creatures like the ouroboros converted by James Holloway, Dracoplasm Demon and Dragonborn of the Everfall to the existing creatures like the Volcanic Shifting Salamander and Nightwalker have all been carefully converted into Fantasy Grounds and easy to use tokens. Add to that the new creatures that show up in Kobold Press Creature Codex. Detailed Creature Development: Kobold Press has worked hard to bring some real life detail to Fantasy Grounds. Each creature has been given a unique mechanic and status. For example, you may see a Dokkumerino in the game. This is based on the player in the game running a dokkum. The dokkum card is placed face up on the game table as the creature is created and the statistics are applied to them. The Dokkumerino has a Dazzling Roar action ability which grants the creature the bonus ability to surprise and stun an enemy. As the creature improves its status in the game it will evolve and gain powers. The creature goes from being a Dokkumerino to a Dokkumlord. Player Creativity: Fantasy Grounds allows players to run their games in a way that will allow them to create a fun game for their players. The mechanics in the game allow players to come up with their own rules, abilities and mechanics. Players can have fun by creating crazy rules, like a Dragonborn with the ability to create a 40 foot long Mephid Fireball. This allows players to choose new rules for their game. Easy to play: Fantasy Grounds is easy to learn and play. If you have even the slightest grasp on the rules, you can start playing right away. Unforgiving: Real life races live at the mercy of those they oppose. Fantasy games are not different. If the other player gets too powerful, they will defeat your character. This creates a good level of challenge for both players. Wide Variety: There are a ton of Fantasy Grounds products. Including the new Kobold c9d1549cdd
