System Requirements For Elden Ring:

General System Requirements Multicore Processing: We recommend playing Diablo III on a multicore processor. The game is designed to take advantage of multiple processor cores, and it will perform much better on a system with more than one core. If you have a dual-core processor, for example, you may want to try it out; you may find that two players can play Diablo III on a single core with only a modest decrease in performance. Operating System: Please ensure that you are running Microsoft Windows 7 (32/64 bit) or Microsoft Windows 8.1
