USES A MULTIPLAYER GAME SYSTEM To lay the foundation of the LAN (Local Area Network) online play function, we are developing the online cooperative play that allows players to seamlessly connect with each other from any location at the same time. Players can get together and construct a compact area in which they can battle as a team, even if they are far away from each other. This system was implemented in the game after consideration of a number of factors, such as the smoothness of player interaction and the frequency with which attacks can be made, depending on the system. DYNAMIC MULTI-BATTLE SYSTEM The battle system is a revolutionary battle system where the player can freely control their on-screen character or enemy at any time. Complex motions can be made with simple actions, and 'swing motions' can be used to call out to friends and opponents. In addition, fully equipped characters can act independently, such as by using RANGE attacks or powerful AOE attacks. Fully Equipped Character Action Complex motions can be made with simple actions, and 'swing motions' can be used to call out to friends and opponents. Fully equipped characters can act independently, such as by using RANGE attacks or powerful AOE attacks. • 13 Maneuvers - Intuitive actions that are simple for beginners yet powerful for veterans. • 5 Powerful AOE Attacks - Spread out your attack attacks, overwhelming enemies. • Practically Infinite Possibilities - When using the 'swing motions,' there is no limit to the range of motions you can make. • Quickly Quickly Swings! - Practice makes perfect. As you progress, you will gain proficiency with each of the attacks. • Easy to Understand - To build your character, the UI will guide you in important actions. There are no complicated controls or actions, allowing you to just get on with it. HUMAN PORTRAYED HEROES By focusing on human representations, the heroine and hero of the game were designed using the latest advancements in CG modelling technology, bringing them to life as actors who can clearly express their own emotions. Each hero represents a different play style - one is a warrior who excels in battle, while another is a skilled mage who specializes in magic. In addition to this, a wide variety of characters of different classes and races can be recruited to create a force that is suitable to your play style. • 13
