You must stop the enemy from taking the main town. Our newly created 3D action game is based on the early days of a place called "The Lands Between". Its creation is inspired by the beautiful fantasy illustrations of the late author, Ryuho Okano. The main protagonist, called "Tarnished" is a half-elf, half-knight who is on the path to getting his place in the world. He must protect the main town. This is a fantasy action RPG where you can freely customize your character, create your own character, and perform duels with monsters. Thank you for playing!

The original Japanese version of Elden Ring will be released in early June.

We wish a pleasant ride on this new platform!

Roquette made a very cute card pack, which allows you to make a cute monochrome. You can create two different cards, of which one has a script, and one a font, and you can use Corrin Script to create a third one.

It's been a few months since we released our
