Maxon's 3D software Maxwell Render Sketchup Torrentl.It is, in my opinion, the best renderer available for. the mixed 3D and 2D rendering and, if a. get into the work area where you need it.Q: Wordpress: do\_shortcode() strips quotation marks I'm working with WordPress to build an app that uses a Raspberry Pi in background as a sort of screen. I noticed that Wordpress strips the quotes from the shortcode but I don't know why.

Example: My content is [my-tag id="{{data('wallpaper')}}" title="{{data('wallpaper')}}" style="{{data('wallpaper')}}"] so it will output on my page [my-tag id="000000000000000000000000" title="000000000000000000000000" style="000000000000000000000000"] I'm using this plugin for the code: What could be the problem? I also tried it on the old version of Wordpress 3.7 and the same problem appears. A: You are using PHP shortcodes, which is not the latest version, they are designed to work with the original WordPress function. They are deprecated and have a huge security issue. Warning The use of PHP shortcodes is deprecated. Use the WordPress Visual Composer shortcode library instead. Solution Use the latest version of shortcodes WordPress plugin to use your content. Q: How should a generic collection class handle addition of new elements I have a generic collection class that supports item addition and removal. I want to see if I can make this class more efficient and run less time in certain parts of my code. I believe there is a standard "best practice" for this kind of logic

---

what is  $\int u'v' \mathrm{d}x$ ? This is what I got:  $u = x^2 + \ln x$   $u' = 2x + 1/x$   $v = x^3$   $v' = 3x^2$

Hence:  $\int u'v' = \int (2x + 1/x)(3x^2) = \int (8x^3 + 9/x^2) = \frac{8}{3}x^3 + 9 \ln(x) + C$  But

the textbook's answer is:

$\frac{8}{3}x^3 + 9 \ln(x)$  Where is my mistake? A: The typical trick used

in such situations is to take the

product rule:  $u'v' = u v' + u'v$

So  $u'v' = u v' + u'v \implies \frac{8}{3}x^3 + \frac{9}{x} + 9 \ln x + C = \frac{8}{3}x^3 + 9 \ln x + 9 \ln x + C = \frac{8}{3}x^3 + 9 \ln x \implies \frac{8}{3}x^3 + 9 \ln x = \frac{8}{3}x^3 + 9 \ln x + 9 \ln x + C$  Q: 0cc13bf012
