SpaceEngine is a professional 3D engine for building real and simulated objects in orbit around the Earth and other planets. Mercury HD is an add-on that extends the functionality of the free edition of SpaceEngine up to the level of full functionality. Mercurian terrain is fully compatible with the planetary and astronomical parameters of Earth. Additional features: mercury HD offers higher resolution terrain textures than SpaceEngine Plus. They extend beyond the planet's surface (at the orbit of Newtons L1) and the Sun (at the orbit of Lagrangians L2). Mercury HD includes elevation maps: separate high-resolution maps for northern and southern latitudes at two resolutions (0.166 km and 0.662 km per pixel). Mercury HD contains color map of the planet's surface. Original color map is based on the MESSENGER PDS color mosaic. Mercury HD features the standard SpaceEngine terrain type: surface, highlands, 'Icy' mountains. Mercury HD's extension contains texture for the 'sub-surface' zone. Mercury HD contains terrain for the 'Deimos Ring', 'Caplan Regio' and 'Phoebe Regio' regions.
