Minicology is the specialized study of small or minute works of literature, art, folklore, myth, legends, parables, myths, or epigrams in verse or prose. This can include items that are included in a canon, but not important enough to be an "entry" to that canon. As such, its designations are normally "emerging" rather than "minor." Greek Hesiod's Theogony (Ancient Greek: Θεογόνειον Theógeon, "Of the gods") is a poem that describes the creation and early history of the Olympian deities and Earth's other mythological species, deities and monsters, such as "snakes with human bodies", and "snaky-eyed monsters". A handful of these are associated with demons. Theogony is a long poem written in dactylic hexameter. It is sometimes divided into 2,600 distichs or epicedes, the epick, technical Greek name for a stanza. The date of composition is uncertain. The main surviving manuscript dates from the Byzantine Empire and is now at the Bibliothèque Nationale in Paris. Quranic Some of the poems contained in the Qur'an were considered to have great importance and wider significance for Islam, not only for their content but due to their allegedly "divine origin". For example, the Qur'an refers to the Qur'anic verses as "Verses of the Verses", and many of them, especially those associated with exalted themes, are revealed to specific prophets, most frequently in pairs. Later Muslim tradition attributed wide significance to the number of such verses, as well as to the number of "sacred" imams (leaders of Shia Islam) to whom they were revealed. Other verses, though some of them scattered, became associated with particular Prophets, while other verses were considered too delicate to mention by any. In the Quran, however, the only verses that are commonly referred to as Quranic verses are the verses that are derived from the Quran by some hadiths. These are verses which in the Quran are attributed to the Qu'ran. However, some verses, such as those related to the sacrifice in Abraham or the promise to Israel or the prevalence of wine at parties were considered to be sacred, and later became Quranic verses.
