Joint Operations: Combined Arms Gold is a team-based, action-packed first-person shooter where players battle it out to prove who has the deadliest strike force! The forces of good face off against the forces of evil as players fight through enemy territory in search of supplies, intel, and weapons. Experience the most realistic, large scale, class based multiplayer combat ever made with Joint Operations: Combined Arms Gold. The waters of the Pacific Ocean are about to erupt as the Chinese People's Liberation Army (PLA) launches the deadliest of its recent attacks against the United States. An orbital facility above the Earth's surface has been hit by a deadly neutron bomb and the entire Pacific has become a nuclear wasteland. The U.S. Government has been forced to step up its counterinsurgency efforts in the foreign sphere as the Chinese reclaim their traditional influence in the world. The U.S. Navy and Marine Corps are tasked with conducting an amphibious invasion of China's heavily-defended territory in an effort to prevent the PLA from gaining a foothold on the world's largest continent. But as much as the United States wishes to end the conflict that has erupted between their forces and the PLA, the Chinese are no less eager for a fight. The Chinese forces have also marshaled for a counterattack that could throw the United States into a second nuclear winter and threaten the very future of civilization. The United States and China are now both fighting for control of the Pacific. As tensions rise, the final battle may very well end the human race.
