ChatIP Description: - Messenger automatically joins chat rooms that have the same web site. - A chat room is a group. For example, two persons start a conversation that you can join. The conversation will remain in the chat room until you leave and you can return to the chat room anytime you want. - In addition, several chat rooms are available for each web site. - Choose your language and have fun. You're just at the door of your own apartment! And, you get real information on the geolocation of the visitors that come to your web page. Geolocation in real time of your visitors that come to your website. Geolocation is based on the method of cell phones that connect to the Internet to get their position, also known as GPS. Already installed on your computer, you will be able to observe, in real time, the geolocation of the visitors that come to your web page, on this and other pages on your site. You can install it free in an easy way, without the technical aspects. You will know the IP and the location of the visitors! You can use this information, to know, for example, who is the best customer of your service. In the same way, you will be able to recommend the nearest Supermarkets, offices and insurance services, to your customers. You can add a small banner that indicates to the visitor where you are. Geolocation IP and Location Example: YOU ARE IN THE BEDROOM OF YOUR OWN APARTMENT!! NOW, GET REAL INFORMATION

What's New in the ChatIP?

* ChatIP is an easy to use tool designed to help you communicate while you navigate the internet. This application will enable you to dialogue with people that visit the webpage you visit. * ChatIP is an easy to use tool designed to help you communicate while you navigate the internet.
