Players in FIFA 22 represent the future of FIFA, with cutting-edge visual effects and gameplay, and unique potential for new fans and players to enjoy FIFA on a bigger, deeper and more immersive level than ever before. This new generation of FIFA gives you the most realistic, balanced, believable and diverse gameplay possible. The world's best players are all present in FIFA 22, including a new FIFA World Cup star in Zinedine Zidane, and UEFA Champions League favourites like Barcelona's Lionel Messi and Inter Milan's new signing Ivan Perisic. FIFA 22 is a wholly new, truly immersive football game experience with three game-changer features: Football in Motion Real-life player data is used to create an authentic football experience: players no longer stand still as they run and move in 3D based on player movements and forces on the ball. There are many innovative new ways to control players in FIFA 22, including new dribbling controls that integrate movement and forces on the ball, new reactive dribbling animations, and player collision systems that respond to player actions and changes in the ball's spin. Because of this, FIFA 22 is the most authentic football game available on any platform. Cutting-edge Visuals New visual quality settings provide a leap forward in realism and immersion: 16x enhanced resolution and True-Life visuals enable players to see every foot, every body part and every reaction on the pitch. Natural In-Game Movement Anticipate where players will be for the next pass in real time - no more standing still and guessing. Players can even be in motion but still perform physics-based animations, and alter their speed depending on the speed of the game and player facing. Dynamic Interactions The results of player actions are noticeable and clear, with players playing to a new level of realism and physicality in cutscenes, gameplay and highlights. Players fight for the ball, and can even collide with other players. Intelligent AI Technology AI is made more intelligent: team strategy is much improved and more tactical and intelligent, and players can even learn complex rival tactics and strategies to better their own game. Improvements made to AI across the board makes for a greater and more diverse variety of tactics in the game, and a more challenging challenge for all players. Wider Football

What's new:

- **Formation Select - the new Create-a-Coach system lets you easily set up your formation.**
 - **Open the Unite-a-Player window and choose the formation you want to use - you can even switch between default and in-play formations for your run of play.**
 - **Use FUT's new-found Formation Select to fine-tune to a formation before unleashing your imagination.**
 - **Dynamic Timing - Timing is what separates the players from the spectators. In Fifa 22 we want to push the boundaries of what we already know about sports timing by using new technologies.**
 - Dynamic timing takes account of the behaviour of the players, the defender and the attacker when challenged with a free kick in each situation. Move, swerve, reverse or score and we find out who's going to get the honour!
 - **In-Stadium Screen.**
 - Personalise your in-game experience right inside the stadiums on the biggest mobile screen in the game. We thought it was time FIFA brought our immersive experience to the Stadium.
