Hurricanesoft Personal Firewall Crack Download

Hurricanesoft Personal Firewall Crack Mac is an easy to use application that offers many useful security features. It provides a user friendly interface that allows you to easily open connections and view current statistics for every application, and network related activity that's currently going on. It does not slow your system down, it runs in the background, and it does not clutter your desktop with icons. Each object can be moved and closed (clicked) like any other windows. Each window has a neat looking border, with a specified colour for the background, text and a sliver for the progress bar. Installation and Features: Just download the installer, double-click on the.exe file and follow the on screen instructions. You will be prompted to restart after you install it, as it requires you to reboot. The following features are available in this version: Hidden IP (Customizable) The software includes a tool which will hide your IP (Internet Protocol) address, behind a unique IP address for you. This will avoid your IP address being broadcast on the Internet. IP Filter You can even filter your IP through its custom rules, so that only certain applications will be able to connect to your computer and access the internet. Startup Setting When you start up Windows, you're given a chance to choose whether you want the firewall to start on startup or not. Protect Your PC Protect your computer from unexpected interrupter or third party programs that try to take over your computer. Restrict Internet Connections With the Internet connection filters, you can deny the following programs from accessing your Internet Connection through the router: Peer to Peer Filesharing, User to User File sharing, File Transfer, Telephony and CD/DVD Sharing. Change Default Programs With this feature, you can change the default program in the internet to be a special one, the first that is launched when you start the computer. You can even create rules for specific applications, like Windows Explorer, Windows Internet Explorer or other program that you use on a daily basis. Connect Your Device Connect your tablet, smartphone, iPod, PSP or other devices with your router and this application. Connect to Internet when You are Outside of Your Home Connect your wireless device to the router when you're outside of your home, and access the internet securely when you're not at home. Multiple Rules You have to create multiple rules for each application, to allow it to access the internet, and to block it if you don't

Hurricanesoft Personal Firewall [Latest 2022]
