We want our fans to be always be able to enjoy the game! In this cyberpunk dating sim, Meena has taken a low-paying job as a security guard at a secret government underground laboratory, where she must guard the orphans who serve as weapons' test subjects and fight against rival ex-Orphans. But while she's trained for every scenario imaginable, she faces the ultimate challenge when the laboratory is attacked and she discovers she's not alone! Meet the other security guards that fight with you and the orphans in a game that mixes dating sim, platformer, action game and 3D fighting! Also available in English and Portuguese languages. Wonderful story, great dialogue. Loved the idea of Orphans and being able to date them. Great twist in my opinion when they look older. I only had one complaint, the Orphans were too similar in looks, I mean they're all completely the same, same head, same hair, same face etc. But I'd recommend this game to anyone. The Orphanage 2 is the second game in the series. It follows Meena. She works at a secret lab as a security guard. She's got super powers so she can fight against rival ex-Orphans. Meena's found a new Orphanage where she can escape if only she can solve the mystery! This is my first review on the game, and I can't say enough good things about this game. It's a very well done role-playing game with a story and characters that I had a hard time putting down. There are so many things I enjoyed about it, starting with the animations, which are gorgeous and fluid. I fell in love with the love interest's adorable voice actors. The combat is simple, but it allows the

Records {#Sec1} ===== Introduction {#Sec2} ----- Confinement in the form of a tight collar might seem like torture, but if you put it on in the correct context, it can be very pleasurable. Such confinement focuses the mind on the experience of being enclosed in a tight, smooth metal circle, which can emphasize one's internal state of being. Non-self-inflicted confines (usually metal, as it is soft and smooth) may promote kinky thoughts or masturbation. Self-inflicted applies to people who want to make themselves feel tighter or more limited. But even a small confinement can induce positive, erotic feelings. We've all seen the image of Leila Khaled, a female Palestinian, bound hand- and-foot in the 1967 Israeli war, on the news. That picture turned her into a symbol of Arab womanhood to someone in the west (and more recently, a symbol to the Muslim world, which has gotten some attention). The picture was shocking, and led to discussion. But it also inspired others, and our review team thought it would be fun to give that a try. We will review studies of self-inflicted, non-oppressive confinement. In each study, they will give us some background on the thoughts, feelings, and behaviors, which they have observed in this context. We'll reflect upon the impact of confinement on values of individual self- and group-esteem, as well as social identity, and the possibility of developing erotic pleasure from it. Confined women and masculinity {#Sec3} ----- In the 1930s, a group of women in the east wing of the NY Home for the Aged used to visit the gym in the basement and manipulate paper dolls. They would fold, unfold, and cut the dolls to decorate them with clothing and makeup. The Institute's director, Dr. Anthony Feuerman, noticed these women's interactions with the dolls, and commissioned a series of articles about the women's behavior---his "dolls"---in various medical, social, and organizational journals. These acts of self-binding and self-decoration with "clothing" and makeup were a coping mechanism for the women, he discovered, and had therapeutic value in improving their social situation. As we know, though, that coping mechanism may have other meanings. One of the articles that Dr. Feuerman included details the women's responses to harassment from male nurses in

WWE Hall Of Fame Demolition: What's Next? There's been a lot of talk and hype surrounding the planned demolition of the portion of the Indianapolis Motor Speedway that houses the WWE Hall of Fame. Hosting an exhibit of wrestling memorabilia is a relic of the past as wrestling is no longer what it once was. "Anybody can run in there and get the same experience as a lucky fan," says IMS president Doug Boles. Talk turned to the racetrack itself, and what might be done with it, since professional wrestling is long gone from the strip once known as the Indy 500. The two most popular ideas: a hockey rink, a decathlon or game courts. A statewide referendum is no longer required since change has been approved by the Speedway, Bucks County Planning Commission and the local legislative branch. Regardless of what the racetrack will become, one thing is certain, none of the ideas being put forward will be anything like the now-demolished portion of the old building. And by now, that is in effect a museum of a sport that is no longer the same.
