Description

Sherman Hill Scenario Pack 01 game key supports new scenarios that are being released with the expansion pack Add-On.

Your keys will work on Uplay and Steam.

Please follow this link to the STEAM store page.

[b]LiveHTS 01

The first series of events for LiveHTS is now open! This series follows the format of the popular Add-Ons series where a new scenario will be released every day for 5 days in a row, May 22-26. Where All the rule changes to the maps follow this new scenario, the first series will start to shift the main focus to the new Half-Life mod 'TerrorTrain'.

If you would like to play the scenario, the best way is to download it through the Steam store. You can then play it through the LiveHTS installer (choose map as well as the scenario addon), or directly play the LiveHTS game!

Steam and Uplay works the same, and a compatible version of the Steam client is required. If this is what you are looking for, see Steam Requirements. If you have a pirated version of Steam, it will most likely not be compatible to the LiveHTS software, and you will not be able to download this scenario pack. The official Steam or Uplay versions are recommended, regardless if you play with your

Dark Souls II is the sequel to the critically-acclaimed Dark Souls series. The game features the return of the game's trademark difficult platforming gameplay, brutal boss fights, and NPC conversations and back-story relating to the previous games. Story Sixteen years have passed since the Undead invaded the land of Painted Isle. In the years following that, the once-great kingdom of Painted Isle has fallen into disarray. People no longer seem to care about standing their ground. Many lives have been lost. There is no longer an educated populace, or competent government, much less an army that could stand against the invaders. Countless people have been transformed into oozes and undead. The northernmost reaches of Painted Isle lie in a peaceful abyss known as The Shroud. The people living there, however, do not enjoy this peace, but have maintained their fortitude, and their faith. They are known as the Sea People. The citizens there had been blessed by the blessings of the Sea King himself, and through this, they have been granted a special power... In addition, there are many who believe in the blessings of the Sea King, and they long for his guidance as darkness descends upon the Kingdom of Painted Isle once more. From here, the events that will unfold will lead to some very big consequences. With a new world come new people and potential allies. The town of Windfall was once a thriving sea fishing town, however recently many have been changing. The people there have been infected by the greed and violence that is present in Painted Isle. As a result, the town has changed drastically. Nobody and anything is safe. In addition, the undead have taken over the port. Men have become the horde. If you manage to survive here, you will find plenty of opportunities to take your revenge, for you will fight and hurt the undead in your new home. Game Features ... The Game has had some updates since I last played so I thought I'd update this guide and make it more relevant for the current version of the game. Some of the great things they've added to the game are: - Options Menu - More weapons - New Monsters - Map System - More Souls - More Maps - New Demon Bats - New Pontiff Essences - New

Thanks, PURE Team / Gal*Gun Double PeaceQ: google maps (v3) marker not appearing I'm building a maps app using AngularJS (no need to mention I'm using a CMS). The problem I have is that markers don't appear. Here's the controller: angular.module('homeApp.maps', ['homeApp.maps.controllers.map'])
.controller('MapController', function(\$scope, \$routeParams, \$stateParams, \$log, \$location, \$timeout, map) { \$scope.locations = locations; \$scope.getLocation = function(location){ var map, center; \$location.path(\$routeParams.map);
\$log.info('getLocation()'); \$log.info(\$routeParams); \$log.info(\$location.path()); \$log.info(\$stateParams); \$log.info(map);
\$log.info(\$location.hash()); if (\$location.hash()) { var marker = { position: new google.maps.LatLng(\$location.hash().latitude, \$location.hash().longitude),

Complete your quest Enter your e-mail Follow the link Earn the last tile! There are only 3 actions! Remove the tile from the board. Get the 2 other tiles. Show entries matching the keyword Click a button to move a tile. Start! What's a Lost Room? A Lost Room is a puzzle game created specifically for retirement homes. The game is finished when you find the missing tile. Create your own puzzles... Create puzzles in different sizes and with different quantities of tiles. You can set the pieces in 'random' mode or you can set them to 'own colour'. You can also set how big the board should be (standard and modular). What is a tile? A tile is a medium shaped piece of glass with a secret 'code' written on it. The code is generally in 3 lines of 3 numbers (same as the 3d-pin in a puzzle), but it can also be in a single line of 4 numbers. The numbers are randomly generated between 1 and 9 (the tiles start out and always end in '9') and the order of the numbers in the line is determined by a randomization method. The lines will be in 7 different colours. How are the tiles coded? Lines of numbers of varying length are encoded on the tiles. The lengths of the lines depend on the size of the tile, the number of lines on a tile and the number of lines specified. For example, the data written on each tile in the six minute puzzle is: 6 lines of up to 5 numbers of random length ranging from one to nine. The 6 spots of colour data are encoded in a similar way but in 9

colours instead of 6. What am I looking for? I'm looking for a unique solution to a puzzle. Unfortunately, I don't know the solution yet, so you'll have to invent it yourself. The solution will only be valid if it fits the following criteria: Must use all the tiles in the puzzle. The solution must only ever be determined using a single copy of the puzzle without reference to other copies. It must be written down once the puzzles are shown and hidden from other members of the public. You can create multiple copies of each puzzle, especially when the solution is only found once in the lifetime of the puzzle. You

Thank you! is the story of a man who is on a mission to answer life-changing questions from other people. So far, the questions have been diverse and have raised a lot of awareness, impact and money for charity. After answering many important questions, your hero is all set to shift his interest into pursuing a new, more ambitious and thrilling career: that of a life coach, a different kind of role model. Play the game to find out more about his new role as a life coach! What's in the box? Thank you! is an interactive adventure game for the mobile and social platform. It contains thought provoking questions and life-changing answers that are designed to create impact and raise awareness for charities. These questions will challenge you and work you in terms of improving your character. You play the role of a man who will answer life-changing questions from people around the world. You have to manage your time effectively by answering as many questions as possible without disturbing your own life. Good luck, have fun and enjoy answering questions! How to play? In the game, you are given a number of questions by the players. You can only answer one question at a time and you can change the question for which you want to answer. So you'll be given a question, answer it and then change it in the next question. The player will be given more time to answer the changed question if he answers correctly! Rewards in the game Help other players and help charities by answering the questions as many as you can. Get prizes for your good work and for the work done by others.
