I'm excited because I have a partner in crime to share this journey with and I'm nervous because I'm the only one who knows what I'm actually doing. There's something to be said about the nervousness of creating a new project or trying something new. There's also something to be said about the knowledge that you don't actually know what you're doing because you haven't attempted it before. This applies to a lot of things, but for my confidence, I love to cook and study restaurants and their menus. I've done that for years, and learned a ton about what I don't know, what I can do better, and what I did really well. It's given me the tools I need to dissect and deconstruct food menus. And this is my first attempt at a blind tasting challenge so I'm really excited to see if I did it right. My partner will be doing this with me, and we want you to be a part of it. This is not some random chef talking about how he learned "Egg Yolk and Butter Shodak" or "Surf b7e8df5c8

President Barack Obama made his second straight appearance at the country's oldest deep-fried pig festival. I'm quoting an old President who's probably dead, but whose the best? Obama was in Louisville, KY, to honor a 2001 National Hot Dog Night champion, the Blue Dog Café, and to talk about that night-long conversation with President George W. Bush. President Obama says the two talked about their respective "instincts" and how old they both were. "That's kind of a baseball metaphor, but it's basically like: he says 'What did you teach me?' and I say 'What did you learn from me?' And I didn't really learn a lot from him, but I think we both kinda figured out that we like to have some fried things." I'm sorry, he says. But that's how that interview went. Really, though, the President is there to talk about his healthcare plan. He's tired, because he says he is "stating the obvious" right now. And while he doesn't compare himself to W, he says he
